DID YOU KNOW?

Gene Sarazen invented the modern sand wedge in 1930. As the name implies, this club is used when playing a ball from a sand trap. The heaviest of all golf clubs, it is designed to force its way through sand particles.

Sarazen won 39 PGA Tournaments during his career.

He was inducted into the World Golf Hall of Fame in 1974.

In 1967, after testing hundreds of lubrication combinations, Leo Lake developed a blend of oil that became the iconic Yamalube brand the world knows today.

To date, Yamalube remains the only oil built around the stringent demands, operating characteristics, and applications of not only Yamaha engines, but all powersport engines. With over 50 years of success, we still strive to make the best even better.
